

BASKET UN-STACKING SYSTEM (Model #58000)

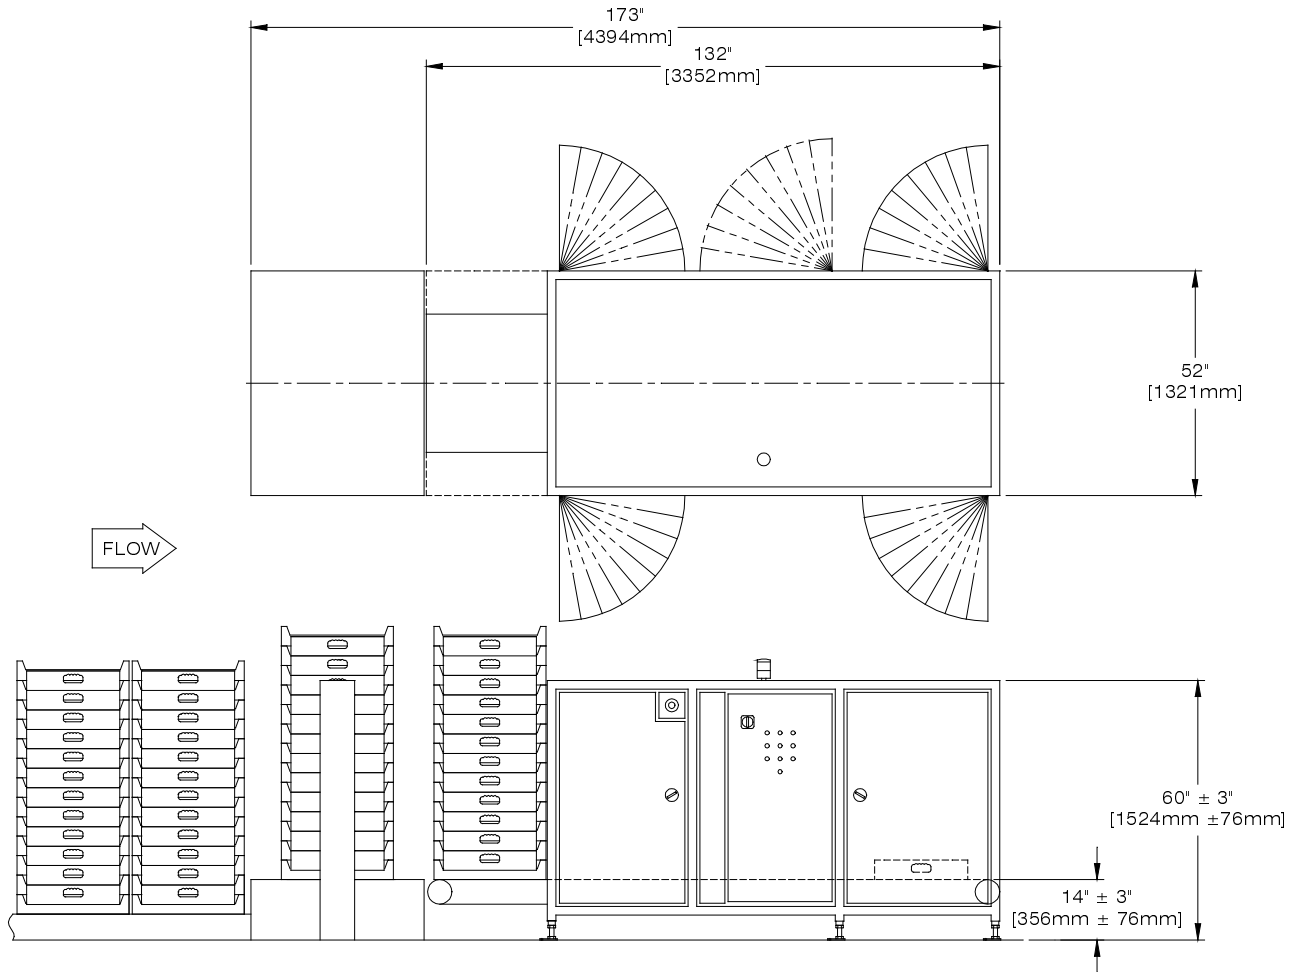

The LeMatic line of Basket Handling Equipment includes a Pre-Stacking unit that stages and stacks loaded baskets two high, a Basket Stacking System that stacks loaded baskets one or two at a time to the desired stack height for transportation, and a Basket Un-Stacking System that un-stacks empty baskets feeding them into the product loading system.

Features

- Un-stacks empty baskets and feeds them singularly into the production process
- Accepts nested stacks of empty baskets
- Accommodates an un-nested basket(s) within a nested stack of empty baskets
- Rugged design incorporates safety, reliability, and accessibility

BASKET UN-STACKING SYSTEM
